

Ideation Phase

Brainstorm & Idea Prioritization Template

Date: 26/09.2026

Team ID: SWTID-2026-7464

Project Name: Script-Controlled ACL – Restrict Record Access Based on Field Value

Maximum Marks: 4 Marks

This template follows the uploaded reference's three-step structure: Step-1 Team Gathering, Collaboration and Select the Problem Statement; Step-2 Brainstorm, Idea Listing and Grouping; Step-3 Idea Prioritization. ■filecite■turn2file0■L16-L19■

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement: How might we restrict record access dynamically based on a specific field value using a script-controlled ACL, while ensuring that authorized users can access the appropriate records?

Team Member	Role / Perspective	Key Problem or Need
1. _____	_____	_____
2. _____	_____	_____
3. _____	_____	_____
4. _____	_____	_____

Step-2: Brainstorm, Idea Listing and Grouping

Generate ideas freely first. The following project-specific idea categories can be used to organize the team's brainstorming results.

Idea No.	Brainstormed Idea	Group / Category	Notes
1	Script checks the record field value before granting access.	ACL Logic	
2	Create reusable script logic for field-based access checks.	Automation / Reuse	
3	Combine field value with the current user's role or identity.	Access Conditions	
4	Provide clear allow/deny behaviour for matching and non-matching records.	Access Control	
5	Add test cases for different field values and user roles.	Testing	
6	Log or document denied access for troubleshooting and auditing.	Audit / Monitoring	
7	Validate the script against empty, invalid, or unexpected field values.	Validation	
8	Create an administrator-friendly configuration guide.	Documentation	
9	Use a consistent pattern for field-based ACL scripts across records.	Standardization	
10	Define fallback behaviour when the required field value is unavailable.	Error Handling

Step-3: Idea Prioritization

Use the team's agreed criteria to compare ideas. Record the score or decision in the final column.

Idea	Security Impact	Implementation Effort	Clarity / Maintainability	Priority / Decision
Script-based field-value check	High / Med / Low	High / Med / Low	High / Med / Low	_____
Reusable ACL script pattern	High / Med / Low	High / Med / Low	High / Med / Low	_____
User + field-value condition	High / Med / Low	High / Med / Low	High / Med / Low	_____
Access testing matrix	High / Med / Low	High / Med / Low	High / Med / Low	_____
Audit / denied-access logging	High / Med / Low	High / Med / Low	High / Med / Low	_____
Validation and fallback handling	High / Med / Low	High / Med / Low	High / Med / Low	_____

Final Selected Idea / Concept	Reason for Selection	Next Action
_____	_____	_____
_____	_____	_____
