

User Acceptance Testing (UAT) Template

Project Overview:

Testing Scope:

- Data rendered correctly in the Power BI report.
- Data preprocessing and transformation.
- Utilization of data filters and slicers.
- DAX queries/measures and calculated results.
- Dashboard design and visualizations/graphs.
- Report design and visualizations/graphs.

Testing Environment:

Test Cases:

Bug Tracking:

Sign-off:

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.

Date	
Team ID	
Project Name	Power BI
Maximum Marks	

Project Name	Power BI
Project Description	Power BI dashboard and report for data visualization, data preprocessing, data filtering, DAX analysis, and reporting.
Project Version	Version 1.0
Testing Period	To be filled by the project team

URL/Location	Power BI report/dashboard location to be provided by project team
Credentials (if required)	To be provided if required

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Verify Data Rendered	Open the Power BI report and review the displayed tables, fields, records, and visuals.	Required data is rendered correctly without missing or corrupted values.	To be filled during testing.	Pending
TC-002	Verify Data Preprocessing	Review the processed dataset and compare it with the expected cleaned and transformed data.	Data is correctly cleaned, transformed, and presented for analysis.	To be filled during testing.	Pending
TC-003	Verify Data Filters	Select different slicer and filter values and observe the dashboard/report.	Applicable visuals and results update correctly according to the selected filters.	To be filled during testing.	Pending
TC-004	Verify DAX Queries / Measures	Review KPI values and calculated measures using different filter selections.	DAX calculations return the expected results and update correctly.	To be filled during testing.	Pending
TC-005	Verify Dashboard Design	Open the dashboard and check charts, cards, tables, labels, legends, and layout.	Dashboard visuals are clear, readable, correctly labelled, and display relevant information.	To be filled during testing.	Pending
TC-006	Verify Report Design	Navigate through all report pages and interact with the available visuals.	Report pages load correctly and present information in an understandable format.	To be filled during testing.	Pending
TC-007	Negative Scenario - Filter Handling	Clear or change filters and observe the report response.	The report handles filter changes without errors or application failure.	To be filled during testing.	Pending
TC-008	Negative Scenario - Data Issue Handling	Test the report with an applicable missing or invalid data condition.	The report handles the condition gracefully and does not display misleading results.	To be filled during testing.	Pending

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	To be recorded during UAT	To be recorded during UAT	Low / Medium / High	Open / In Progress / Closed	To be filled
