

Project Development Phase

Model Performance Test

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

Note: Date and Team ID have intentionally been left blank, as requested. Visualization/graph counts can be entered after the Power BI dashboard and report are finalized.

Date	
Team ID	
Project Name	Power BI
Maximum Marks	

S.No.	Parameter	Screenshot / Values
1	Data Rendered	Dataset is successfully loaded and displayed in Power BI. Tables, columns, records, and required fields are rendered correctly.
2	Data Preprocessing	Data is cleaned and transformed using Power Query. Unnecessary columns/rows are removed, data types are corrected, and missing/duplicate values are handled as required.
3	Utilization of Data Filters	Slicers, visual-level filters, page-level filters, and report-level filters are applied to allow users to view the required subset of data.
4	DAX Queries Used	DAX measures are used for required calculations such as Total, Average, Count, Percentage, and other project-specific KPIs.
5	Dashboard Design	No of Visualizations / Graphs - To be filled based on the completed dashboard. Dashboard includes appropriate charts, cards, tables, slicers, and other required visuals.
6	Report Design	No of Visualizations / Graphs - To be filled based on the completed report. Report pages present the analyzed data clearly using appropriate visuals and formatting.
